Table of Contents

Chapter 1 Workshop Considerations	23
1.1 Lighting	23
1.1.1 Lighting Tips	23
1.2 Organisation	23
1.3 Tips	24
1.3.1 General Storage Tips	24
1.3.2 Storage and management of parts	24
1.4 Safety	25
1.4.1 Electrical Safety	25
1.4.2 Explanation of Electrical shock and its dangers	25
1.4.3 Important note on electrical safety	26
1.4.4 Isolation Transformers	26
1.4.5 RCDs	26
1.4.6 Safety Advice	26
1.4.7 Other safety considerations	26
Ventilation	26
Eye protection	26
1.4.8 Electrostatic component protection	27
1.4.9 Electrostatic discharge Tips	27
1.5 Set up	27
1.5.1 Space	27
1.5.2 Workbench set up	28
1.6 Test Equipment and Tools	28
1.6.1 Multimeters	29
Analogue	29
General Rules of Usage of an Analogue multimeter	29
Digital	31
1.7 Notes on DMM meters maintenance and procedures	32
1.7.1 Calibration	32
1.7.2 Oscilloscopes	32

- 1.7.3 Bench Power supplies 33
 - Signal Tracers. 34
 - Function Generator and signal injectors 34
- 1.8 Active and Passive Component testers 34
 - 1.8.1 Passive Component testing 34
 - ESR meters 35
 - 1.8.2 Frequency counters. 35
 - Frequency counters 35
 - Other handy Equipment and/or job specific equipment 35
- 1.9 Essential servicing Tools 36
 - 1.9.1 Soldering /desoldering Tools 36
 - Simple Irons. 36
 - Soldering Rework stations 36
 - Soldering accessories 36
 - Maintenance of soldering equipment 36
 - 1.10 Hand tools 37
 - 1.11 Further testing advice and techniques 38
 - TIPS on using testing equipment. 38
 - 1.11.1 Handy Auxiliary items: servicing aids (cleaners, glues etc.) 38
 - 1.12 Summary 39
- Chapter 2 Obtaining Spare Parts: component properties and uses. 41**
 - 2.1 General explanation of discrete component types & parameters. 41
 - 2.2 Passive components 41
 - 2.2.1 Resistors 41
 - 2.3 Capacitors and components with capacitive properties 43
 - 2.3.1 Capacitors 43
 - 2.3.2 Other components with capacitive properties 44
 - 2.3.3 Inductors and components with inductive properties. 45
 - 2.3.4 Other components containing inductive properties 45
 - 2.4 Dynamic components 46
 - 2.4.1 Diodes. 46
 - 2.4.2 Transistors. 47

2.4.3	3 FETS & MOSFETS	48
	Integrated circuits	48
	Operational amplifiers and other common ICS	49
2.4.4	Mechanical and hardware parts	49
2.4.5	Safety tips when working on parts	50
2.5	Methods to obtain replacement parts	50
2.5.1	New for old	50
2.5.2	Re-used salvaged parts	51
	Salvaging tools	51
2.5.3	Methods of extraction	52
	Using wire cutters	52
	De-soldering technique for obtaining salvaged parts	52
2.5.4	Tips for Desoldering parts for salvaging DIL ICs	53
	Other extraction methods.	54
	Extracting parts with a propane blow torch.	54
	Other considerations of when salvaging parts	54
2.5.5	Repairing parts to extend longevity.	54
2.5.6	Improvisation as a last choice	55
2.6	Summary	56
Chapter 3 Obtaining source information for repair		57
3.1	Schematics and Service Manuals	57
3.1.1	Having an identical working audio equipment to reference.	58
3.2	Circuit tracing procedures (alternative method to no schematic)	58
3.3	Other ways to obtain information about audio products.	58
3.3.1	Parts identification (old/replacement parts) when no schematic available	58
	Passive Components	58
	Capacitors	59
	Inductors	59
3.3.2	Semiconductor Components.	59
	Transformers	60
	Speakers	60
	Motors and drive parts.	60

Fuses	60
Switches	60
Display Components	61
3.3.3 Identifications of electronic circuit functions	61
3.3.4 Tips on identifying rail voltages	61
3.4 Summary	61
Chapter 4 Initial Diagnostic Testing	63
4.1 Important Tip	63
4.1.1 Having a highly organised and methodical approach to diagnosis	63
4.1.2 Incorrect diagnosis of a fault	64
4.1.3 Procedures and ideas in correct diagnosis of a fault	65
4.1.4 Elimination by substitution.	66
4.1.5 Understanding the prognosis of repairing - Is it worth the pursuit?	66
4.1.6 Customer history of audio equipment received to your workbench	67
4.1.7 Types of Symptoms	67
4.1.8 Methodology to localise the fault	69
4.1.9 Specific Component tests –in circuit and out	69
4.1.10 Resistors and general resistive checks.	70
4.1.11 Checking shorts with a milliohm meter	71
4.1.12 Silicon Diodes.	72
4.1.13 LEDS	73
4.1.14 Zener Diode	73
4.1.15 Transistors & FETs.	73
4.1.16 Transistor checks	74
4.1.17 JFET checks	76
4.1.18 Capacitors and the properties of capacitance	77
4.1.19 Checking Electrolytic capacitors	80
4.1.20 ESR Testing of Capacitors	80
4.1.21 Inductors and the properties of inductance	80
4.1.22 Power Supplies	82
4.1.23 Linear Power Supplies	83
4.2 Battery Power	83

Testing of batteries	83
4.3 Signal Tracing	83
4.3.1 ICs	84
4.3.2 Note taking and tracking testing procedures	84
4.4 Summary	85
Chapter 5 Repair Techniques and commissioning	87
5.1 Dismantling/re-assemble procedures	87
5.1.1 Antistatic considerations	87
5.1.2 Board Plugs and wiring arrangements	87
5.1.3 Liquid Spillage	87
5.1.4 Board Damage	88
5.1.5 General tool usage	88
5.1.6 Using drivers	88
5.1.7 Audio equipment veneering	88
5.1.8 Heatsinking and thermal tips	89
5.1.9 Solder and its properties	89
5.2 Desoldering Technique for removing faulty components	89
5.2.1 Clip out method	90
5.2.2 IC extraction methods	90
5.3 Soldering technique	91
5.3.1 Final checks after the soldering	93
5.3.2 Tips on soldering irons	93
5.3.3 Ensuring Repair successful (soak testing) and rechecks	93
5.3.4 Final reassembly	94
5.3.5 Serviced equipment risk of repeat failure	94
5.3.6 General maintenance	94
5.4 Summary	95
Chapter 6 Servicing of Tuner /Home Entertainment Amplifiers	97
6.1 The Tuner	98
6.1.1 Introduction	98
6.1.2 Radio reception	98
6.2 Analogue AM & FM Radio	99

6.2.1 Superheterodyne design	99
6.2.2 Radio Aerials	100
The AM/FM aerials.	100
6.2.3 The tuning and RF amplifier	100
6.2.4 The mixer	100
Selectivity	101
Local oscillator	101
The IF Amplifier block	101
6.3 Demodulator stage	101
6.3.1 AM Detection	101
6.3.2 FM Detection	102
6.3.3 Stereo FM decoders	102
6.4 Common Radio faults	102
6.4.1 Antenna problems.	102
6.4.2 Multipath distortion.	102
6.4.3 Interference.	103
6.4.4 Use of aerial signal attenuator	103
6.4.5 RF circuit faults	103
No signal	103
Low or weak signal	103
Strong overloading signals	103
AM/FM switching faults	104
6.4.6 Tuner systems and problems faults.	104
Tuners	104
Mechanical tuners with a dial cord.	104
Plastic toothed runners	104
Digital tuners with key scan	105
Front end signalling faults	105
6.4.7 IF stage Faults	105
Description of IF stages and signalling.	105
No output.	105
Overloading	106

Instability	106
6.4.8 AGC (Automatic Gain Control)	106
General description of AGC	106
6.4.9 Detector faults	107
AM Detector/ FM Detectors	107
Alignment	107
Component replacement and screening considerations	107
6.5 The amplifier	107
6.5.1 Types of amplifiers	108
6.6 Descriptions of amplifier stages	109
6.6.1 Power supplies	109
6.6.2 Input stages	109
Signal levels	110
6.6.3 The preamplifier and user control section	110
Loudness control	110
Volume control	110
Balance control	110
Tone control	110
Filters	111
6.6.4 The output stages	111
6.6.5 Muting and Protection circuits	111
Protection	111
Muting	111
6.7 Common problems and solutions of an amplifier	112
6.7.1 Amplifier section faults-Output stage	112
IC output stages	112
Transistor and FET output stages	112
No output on one channel	112
No output on both channels	112
Other Signal Path issues	113
6.8 Distortion	113
6.8.1 Harmonic & IM Distortion	113

6.8.2	Crossover distortion and clipping distortion	114
	Crossover distortion	114
	Clipping distortion	114
	Transient distortion	114
6.8.3	Causes and remedies of distortion	115
	Noise problems and interference	115
6.8.4	Cables and connectors	116
	Instability	116
	Poor Bass and Treble response	116
	Bass response losses	116
	Final listening test	117
6.9	Power supply faults	117
6.9.1	Basic checks	118
	No Power and initial checks	118
	Checking Fuses	118
	Checking power indicators	118
6.10	Regulation issues	119
6.10.1	Poor regulation	119
6.10.2	No Regulation	119
6.10.3	No output	119
6.10.4	RFI interference	120
	Ripple and Hum	120
6.10.5	Final output testing	121
6.11	Summary	121
Chapter 7 Cassette Deck players		123
7.1	Introduction	123
7.1.1	The audio cassette	123
	Magnetic Tape surfaces	123
7.2	The Tape deck player	125
7.3	Cassette Deck Motors	125
7.3.1	Servo Controlled Motor Drives	126
	DC Motors (Brushed)	126

7.3.2	Hall Effect motors	127
7.4	Mechanical operation – Overview	128
7.4.1	Drive motors	128
7.4.2	Motor speed	128
7.4.3	Slip clutch	129
7.4.4	Control linkage	129
7.4.5	Capstan	129
7.4.6	Take-up /Supply reels and braking	130
7.5	User control buttons	131
7.5.1	Play/Record modes	131
7.5.2	Fast-forward/Rewind	131
7.5.3	Search Mode	131
7.5.4	Pause	132
7.5.5	Load and Eject	132
7.5.6	Auto stop detection	132
	Mechanical detection	132
	Electronic detection	132
7.5.7	Cassette-in detection	133
7.5.8	Tape type Selection	133
7.5.9	Tape counters	133
7.5.10	No Record protection	133
7.6	Electronic operation – Overview	133
7.6.1	Tape heads	135
7.6.2	Equalization	135
7.6.3	The record signal path	136
7.6.4	The play signal path	136
7.6.5	The Erase Head	136
7.6.6	Record and playback switching	137
7.6.7	VU meters and recording levels	137
7.6.8	Noise Reduction circuits	137
7.7	Mechanical related faults	137
7.8	Motor faults - general	137

7.8.1 Symptom: Poor motor torque.	138
Testing.	138
Possible causes.	138
7.8.2 Symptom: Motor Speed too fast or slow	139
If a motor speed is running too fast:	139
If a motor speed is running too slow:	139
7.8.3 Symptom: Motor creating electrical noise	139
7.8.4 Symptom: Worn top bearing of motor.	140
7.8.5 Capstan and pinch roller drive assembly	140
7.8.6 SYMPTOM: Faulty Capstan Motor creating mechanical noises	140
7.8.7 SYMPTOM: Faulty or poor quality cassette tape	141
7.8.8 Brakes replacements and adjustment	141
7.9 Electronic related faults.	142
7.9.1 Switch problems.	142
Bias Oscillator.	142
Erase faults	142
Audio circuits	142
Noise reduction fault failures	143
Search systems.	143
Record playback switching	143
7.10 Care and Maintenance.	143
7.10.1 Audio cassette	143
Cassette Deck player.	144
7.10.2 Play/Record Head maintenance.	144
Cleaning.	144
Checking head wear	144
Head Replacement	144
Head alignment and adjustments	145
Head Demagnetising	145
7.11 Repairing Idler wheels.	146
7.11.1 Belt replacements	146
Electrical adjustments	146

7.12 Maintenance of the compact cassettes	147
7.13 Summary	147
Chapter 8 Repairing turntables	149
8.1 Description of the turntable	149
8.1.1 The Turntable motor	151
8.2 Induction motors (brushless)	151
8.3 The platter (or phono table)	152
8.3.1 Platter Settings	152
Speed selection.	152
Platter speed adjustments	153
8.3.2 The Tonearm	153
Tonearm settings	154
8.3.3 Cartridge and Stylus	154
Ceramic (or Piezo) and Magnetic.	154
8.3.4 The Stylus	156
8.3.5 Turntable suspension	156
8.3.6 The Platter.	156
8.3.7 The Dust cover.	157
8.4 Common Turntable faults and maintenance	157
8.4.1 Motor faults	157
Idler wheels and belts	157
Speed Selection and adjustment.	159
Wow and Flutter	159
Common tonearm & cartridge faults and maintenance.	159
8.4.2 Sound faults.	160
Weak or no sound on one or more channels	160
Hum and interference	161
Distorted sound	161
8.5 Summary	161
Chapter 9 Repairing CD players (CDPs)	163
9.1 The CD player – A general operational description	163
9.1.1 Reading the CD	164

9.1.2	Focus servo	164
9.1.3	Tracking servo	164
9.1.4	Carriage servo	166
9.1.5	The RF amplifier	166
9.1.6	The Decoder	166
9.1.7	Digital Filters	166
9.1.8	Digital to Analogue conversion	167
9.2	Faults with CD Players.	167
9.2.1	Initial Checks	167
	Prior tampering.	167
	Checking the Objective Lens.	168
	Procedure in Lens cleaning	168
	Power Supply Checks.	168
	Initial system controller checks.	168
	The Compact Disc	169
	Disc Loading	169
	No Disc Spin.	170
	No Playback	170
	Start/Stop disc Rotation.	170
9.3	Playability faults.	170
9.3.1	Skipping or Jumping	170
9.3.2	Search and erratic behaviour faults.	171
9.3.3	Sound faults.	171
9.4	Summary	171
Chapter 10 Speaker & Microphone Repairs		173
10.1	Speakers	173
10.1.1	The speaker enclosures or boxes	173
10.1.2	Moving Coil Speaker Driver	173
	The frame	174
	The magnet assembly	175
	The voice coil	175
	The suspension system	175

The cone	175
10.2 Speaker Driver Faults	175
10.2.1 Moving Coil Speaker driver faults	175
10.3 Summary of speaker faults	176
10.4 Microphones.	177
10.4.1 The condenser microphone	177
10.4.2 Dynamic Element microphone	178
10.5 Summary	179
Appendix A Common audio connectors and pinouts	181
Appendix B Additional Information	183
Appendix C Safety Information	187
Appendix D Understanding 'Pit' and 'Bump'	191
Index	193
