Acoustics in Performance

All you need to know about good acoustics and sound systems in performance and worship spaces

Richard A. Honeycutt, Ph.D.
# INTRODUCTION

## I. THE SCIENCE OF ACOUSTICS
1. Architectural Acoustics: Then and Now 9
2. Physical Acoustics: The Nature of Sound 10
3. Physiological Acoustics: Loudness 18
   - Localization 20
   - Discrimination of auditory events 21
   - Masking 21
4. The Nature of Speech, Music, and Noise 22

## II. PHYSICAL ACOUSTICS OF ROOMS
5. Reverberation 25
6. Echoes 29
7. Strength 30
8. Other Factors 31
   - Intimacy 32
   - Envelopment 32
   - Warmth 33
   - Spaciousness 33
   - Clarity and Definition 33
   - Ensemble, Stage Support 34
   - Ambient Noise 34
   - Uniform Sound Coverage 35
   - Speech Intelligibility 35
9. Factors in Room Design 36
   - Shape 36
   - Volume 40
   - Occupancy 41
   - Finish Materials 42
   - Acoustical Insulation 45
   - Heating, Ventilation and Air Conditioning (HVAC) 47
   - Factors Affecting Congregational Hymn Singing and Liturgical Reading 47

## III. ATTAINING THE GOAL
10. Preferred Acoustical Performance of Performance Spaces and Sanctuaries 49
    - General Comments 49
11. Preferred Acoustical Performance of Fellowship Halls, Gymtoria, and Life Centers 60
12. Preferred Acoustical Performance of Viewing Rooms 61
13. Preferred Acoustical Performance of Rehearsal Rooms 62
IV. CONTROLLED ACOUSTICS

14. Sound Systems: Intro to Sound Systems
   Design Targets — Loudspeakers and Amplifiers 66
   Design Targets — Electronics 71
   Mixers — Analog 72
   Equalizers and DSP’s 74
   Digital Mixers 74
   Microphones — Wired and Wireless 76
   Hearing Assistance Systems 78
   Portable Sound Systems 79
   Stage Monitors 80

15. Reverberation Enhancement 81

16. Variable Reverberation
   Coupled Spaces 83
   Reversible Panels 84
   Draperies 84

V. WORKING WITH YOUR ROOM

17. Sound System Use
   Introduction 85
   System Power 85
   System Layout 85
   Automix System with No User Controls 87
   Automix System with User Controls 88
   Manual Mix Systems 89
   Digital Mixers 89
   Audio Recording Using CD and DVD Recorders 96
   Effects (Artificial reverb, echo, etc.) 98

18. Using Portable Sound Systems 100

19. The Musician/Vocalist Environment
   Using Monitor Loudspeakers 103
   Rehearsal in Empty Rooms 104

20. Correcting Poor Acoustics in Existing Rooms and
    Maintaining Good Acoustics Through a Renovation
    General Renovation Issues 104
    Correcting Poor Acoustics 105

APPENDIX A: OBTAINING GOOD ADVICE ON ACOUSTICS 106
APPENDIX B: COMPUTERIZED ACOUSTICAL ANALYSIS 109
APPENDIX C: REFERENCES 113
