## Guest Editorial

Digital Audio: Progress, Stagnation and Regression - Gary Galo 3

## Tube Power Amplifiers

The Ultra-Linear Power Amplifier – An adventure between triode and pentode –  
Rudolf Moers 11  
The C70 Vacuum Tube Amplifier – Bob Cordell 49

## Solid State Power Amplifiers

Look, Ma, No Distortion! The Class i output stage - Kendall Castor-Perry 67  
A New Amplifier Topology with Push-Pull Transimpedance Stage - Samuel Groner 91

## Circuit design

Simple loudspeaker correction filters - Marcel van de Gevel 117  
The Arch Nemesis gets a SiC – Nelson Pass 143  
Zen à Cen à Sen - Evolution of a Minimalistic IV Conversion Circuit - EUVL 151

## Perception

Controlled listening – Stuart Yaniger 163

## Book reviews

Douglas Self, The design of Active Crossovers – Kendall Castor-Perry 177  
Rudolf Moers, Fundamental Amplifier techniques with Electron Tubes – Guido Tent 180

## Letters to the Editor on Vol 1 articles

Both Menno Vanderveen and Marcel van de Gevel commented on Bruno Putzey's article  
The F-word - or, why there is no such thing as too much feedback;

Cyril Bateman and Samuel Groner commented to Ed Simon on Resistor non-linearity –  
there's more to  $\Omega$  than meets the eye;

Brad Wood commented to Ovidiu Popa's article On the Noise performance of Low Noise Input  
Stages.

*Read these and all other Letters and the author's reply on-line at [www.linearaudio.net](http://www.linearaudio.net)*

*Due to unforeseen circumstances, the second part of Scott Wurcer's low noise mike preamplifier design  
will appear in Volume 3.*
